

BAHAMAS SUPPLY & AIRCONDITIONING (FREEPORT) LTD.

After nine years of inactivity, Bahamas Supply & Airconditioning Ltd., is once again open for business. This time, under the competent management and ownership of the successful operators of Standard Plumbing Ltd.

Located in the industrial area of Queens Highway, Bahamas Supply & Airconditioning is the last establishment on the left hand side of the street, if you're travelling toward Eight-Mile-Rock and West End. It's doors initially opened in the early '60s.

When Freeport's economy ex-

perienced the well remembered decline, the Bahamas Supply building became one of many, abandoned and boarded up. Over the nine year period, trees grew up where much traffic once tread, and of course the vandals had their way.

Today however, instead of rubble and small wild life and birds indigenous to Grand Bahama, the show room now proudly displays major household appliances, such as stoves and refrigerators in beautiful assortments.

The showroom and offices,

storage and work shop now buzz gaily with the polite laughter of friendly employees; confident assurance of the sales staff; and the excited questions of a steadily growing clientele.

It is expected that this All-Bahamian owned and operated Bahamas Supply & Airconditioning Ltd., with its ten employees, will continue to grow, as it sells, guarantees and service the popular Tappan, General Electric and Carrier Appliances. And continue to prosper towards the next twenty-five years or Golden Anniversary of Freeport/Lucaya.
